Professional Summary

Senior Business Intelligence and Advanced Analytics Specialist with an M.Sc. in Applied Analytics and more than five years of experience designing data solutions for B2B and B2C operations across Latin America. Experienced in Microsoft Fabric, Power BI, BigQuery, SQL, and Python, spanning data integration, modeling, quality, executive visualization, and predictive machine learning solutions. Translates business needs into KPIs, analytics products, and actionable insights while working directly with clients and regional and international teams.

Professional Experience

Business Intelligence Expert - ILC Project

2026

Colombia

Quantico

- Designed and optimized BI solutions in Microsoft Fabric and Power BI for budgeting and simulations, customer requests, service, production, quality, corporate affairs, and learning.
- Built analytics flows with Dataflow Gen2, pipelines, Delta tables, SQL views, notebooks and Python scripts, semantic models, and Dynamics 365/Dataverse connections.
- Strengthened semantic models, DAX measures, and executive visualizations while diagnosing quality, refresh, and dependency issues across Lakehouse and SQL analytics endpoints.
- Led requirements discovery, sprint planning, iterative delivery, demonstrations, and results presentations with ILC stakeholders and business teams.

Business Intelligence Analyst

2024 - 2026

Bogota, Colombia

InfraCommerce

- Designed analytics solutions for regional B2B and B2C e-commerce operations for global brands including H&M and Mondelez, integrating BigQuery, Cloud Storage, APIs, and Power BI.
- Built and optimized SQL queries, routines, and pipelines using a medallion architecture (Bronze, Silver, and Gold layers) with data quality, reconciliation, standardization, and lineage controls.
- Reduced processing costs for critical BigQuery workflows by approximately 60% through incremental redesign, partitioning, and scheduled-query cleanup.
- Developed semantic models, KPIs, and advanced Power BI dashboards focused on performance, user experience, documentation, and metric consistency.
- Led requirements, sprint planning, and results presentations with clients and regional and international teams.

Business Intelligence Analyst / Digital Analyst

2021 - 2024

Bogota, Colombia

IPG Mediabrands - Initiative

- Designed executive dashboards and reporting to monitor digital campaign KPIs and support media investment decisions.
- Integrated, cleansed, and modeled data from multiple platforms using SQL, partial automation, and consistency controls.
- Translated stakeholder requirements into metrics, ad hoc analyses, and actionable visualizations.

Featured Projects

Demand Forecasting Model for the Wholesale Channel - Mondelez Colombia

Python · SQL · Machine Learning · BigQuery

- Developed an ML pipeline to forecast demand by SKU, customer, and month, integrating time-series signals, inventory, and pricing to prioritize commercial opportunities.
- Achieved an RMSE of 7.21 versus a 7.51 baseline and an R^2 of 63.5%, producing an actionable opportunity view for each sales representative.

RUNY - Machine Learning Platform for Runners

Master's capstone project - M.Sc. in Applied Analytics

Python · FastAPI · React · Railway · Cloudflare · Supabase · GitHub

- Created and led a predictive analytics web application for runners, from data and ML architecture to Strava integration and production deployment.
- Built a four-level hierarchical architecture that reduced MAE from 63.80 to 34.34 s/km, a 46.2% improvement, across 46 athletes and 9,049 comparable sessions.
- Applied walk-forward temporal validation and statistical testing with data leakage prevention, paired comparisons, Wilcoxon tests, and Holm correction.
- Delivered a FastAPI/Railway API, Cloudflare frontend, Supabase persistence, and CI/CD automation through GitHub Actions.

Education

M.Sc. in Applied Analytics

2026

Chia, Colombia

Universidad de la Sabana

Business Intelligence Diploma

2021

Bogota, Colombia

Universidad Nacional de Colombia

B.A. in Business Administration

2020

Bogota, Colombia

Universidad Nacional de Colombia

Technologies and Capabilities

BI and Microsoft:

Microsoft Fabric, OneLake, Lakehouse, Dataflow Gen2, Data Factory Pipelines, Power BI, DAX, Power Query, semantic models, Dynamics 365/Dataverse

Cloud and data:

BigQuery, Cloud Storage, advanced SQL, ETL/ELT, pipelines, Delta tables, APIs, medallion architecture (Bronze/Silver/Gold), data quality, and cost optimization

Data Science:

Python, Pandas, scikit-learn, AutoML, machine learning, linear models, Random Forest, time series, feature engineering, and statistical validation

Automation and delivery:

Basic automation with Google Apps Script, Python scripts, APIs, and GitHub Actions; FastAPI, Docker, Git/GitHub, Railway, Cloudflare, Supabase, Jira, and Scrum

Languages

Spanish: Native | English: Upper-intermediate / professional working proficiency (B2)
